WELDMATIC 205S: CP102
CP102-17 LIMITING INDUCTANCE

In some early production machines, a problem was experienced where the insulation of the cable in the Limiting Inductance Assembly overheated and melted. The cable has now been replaced with a special High Temperature version.

Part Number for the cable is CABW16 (Rubber Sheath) x 1.3 m long, and the lugs are P/N H1415 (2 required).
