

## CP38-10/05 PRINTED CIRCUIT BOARD

Changes have been made to the CP38-10/05 printed circuit board.

1. C34, C35, C43, C49, C50, C63, C65 and C69 were 0.1  $\mu$ f green caps (W11-6/13). They have now been changed to ceramic type 0.1  $\mu$ f (CP34-52/35).
2. C66 an 0.1  $\mu$ f green cap (W16-11/6) has been replaced by a 10 F electrolytic (AM69-1/6).
3. R17 A 47K resistor (W11-7/4) is now 10K (W11-7/5).
4. R6 A 330  $\Omega$  resistor (W16-11/3) is now 470  $\Omega$  (CP23-17/13).
5. R4 and R5 were 1K (W11-7/9) and R7 was 470  $\Omega$  (CP23-17/23) are all now 2K2 (W11-7/10).
6. R34 A 2K2 resistor (W11-7/10) is now a 1K8 (CP28-14/2).
7. R36 which did not have a spec is now a 43K, 1% MR525 type (CP38-10/17).
8. R46 a 33K (W16-11/6) is a new addition.

New board identification will be CP38-10/C3.
