## MILLER 60 SERIES WIREFEEDERS CARRIER GEAR CHANGE

The following information has been received from Miller

\*\*\*\*

Effective with Serial Number KE756284 approximately Mid November 1994 all 60 Series Wire Feeders will be manufactured with a new 24 pitch drive roll carrier and pinion gear (previously 12 pitch).

This product enhancement (gear change) will allow our feeders to run smoother, quieter and more efficient and extended service life.

Optional two to four drive roll conversion kit:

This gear change will necessitate a new stock number for the two to four drive roll conversion kit.

For 60 Series Feeders manufactured with KE756284 or later, use kit # MR172104.

For 60 Series Feeders manufactured prior to Serial Number, use kit # MR132128.

Please ensure you order and supply customers the right conversion kit.
